## History

We are able to answer quickly and satisfactorily to the specific requests about pets, thanks to the strong multi year experience and to the high-quality standard of the factors of production that we use.

## Team

We are a team, so we certainly know that we will reach our goals only if we base our job on team-work, sharing our best capacities.

## Innovation

We are always looking for innovative solutions: the product and process innovation play a key role on our business. The change that involved us, did not affect the high standard of our products and the attention we pay to the environment and territory.

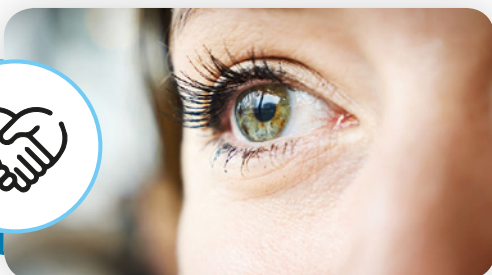

## Technology

Creativity is helping us to develop new products, the technique to realize them. The constant research of innovative and cutting-edge solutions permits us to offer high quality of productive combinations.

## Environment

Our business is well equipped with concrete tools, which monitor and reduce the environmental impact, in all its steps: from planning, to the production and the recycling of the products realized.

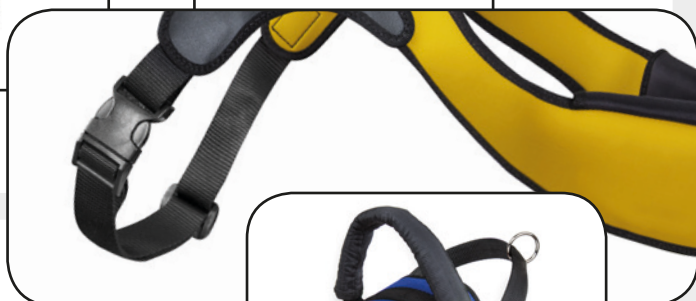

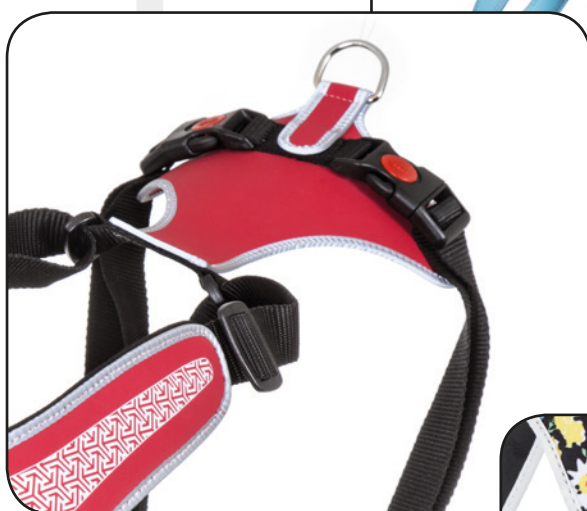

## Code of Ethics

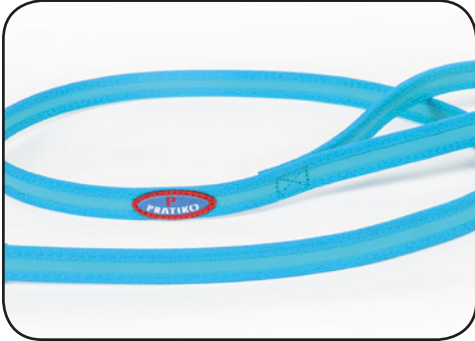

Our code of ethics defines the guideline to follow in terms of equity, respect, solidarity, environmental and person's protection in all the decisional and operating activities of each director, employee, collaborator, customer and supplier.

# Materials

## Ecological and hypoallergenic PVC

the ecological and hypoallergenic PVC is a material developed by a team of engineers and chemists. It is subjected to test of breakup, tear, delamination and abrasion.

## Neoprene

Neoprene is a hydrophobic material, extremely elastic, resistant to any kind of laceration. Its particularly softness does not create any type of abrasion on the pet's hair.

## NET (Mesh)

The net "mesh" is a breathable and extremely comfortable material. Due to its specific characteristics, is it perfect for the hottest/months.
